21st Century Skills

What are they?

The *21st Century Skills* are a set of abilities that students need to develop in order to succeed in the information age.

The Four Cs

Communication

Sharing thoughts, questions, ideas, and solutions

Collaboration

Working together to reach a goal — putting talent, expertise, and smarts to work

Critical Thinking

Looking at problems in a new way, linking learning across subjects & disciplines

Creativity

Trying new approaches to get things done equals innovation & invention

What about teachers?

1. Curiosity

Curiosity

- about students and their opinions
- about what we can learn from our students
- about the classroom dynamic
- about changing our routine
- about the language we teach

Curiosity...

...about students and their opinions

Some questions to ask students:

**What was your
favourite lesson last
year?**

**What was your least
favourite lesson last
year?**

**What would you like to
try out in English
lessons?**

**Is there anything you
would like the teacher
to know about you?**

Curiosity...

...about what we can learn from our students

Curiosity...

...about the classroom dynamic

Observe yourself in action...

Think
Predict
Reflect

Curiosity...

...about changing our routine

“creatively spoil your routine”

Curiosity...

...about the language we teach

My Four C's

1. Curiosity

2. Challenge

Challenge

- setting start-of-year challenges
- identifying puzzles to solve
- adopting different perspectives
- finding weakness to work on
- refining plans and approaches

Challenge

Setting start-of-year challenges

keep a journal

learn names

Challenge

Identifying puzzles to solve

Scrivener, J (2005) *Learning Teaching*

My puzzle

Find out:

Do I have a **right-hand bias**?

Challenge

Adopting different perspectives

Activity for teachers:

- Reflect on a lesson from a student's perspective
- Share with students

Activity for students:

Write a 'bizarre behaviour' internal monologue

Challenge

Finding weaknesses to work on

Become an elementary-level learner at something

QUESTION WORDS	
Where?	Waar?
When?	Wanneer?
Why?	Waarom?
What?	Wat?
Who?	Wie?
How?	Hoe?
How much/many?	Hoeveel?
Is/are there?	Is/Zijn er?

Challenge

Refining plans and approaches

Remember the benefits of taking risks...

...and the link between *making mistakes* and *getting better*

Until you fall over, you
can't understand
balance

My Four C's

1. Curiosity
2. Challenge
- 3. Compromise**

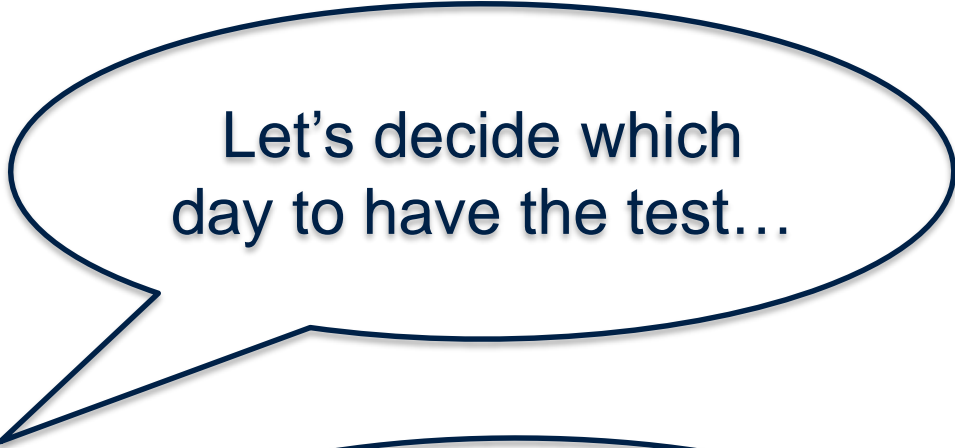

Compromise

- a willingness to negotiate
- handling tests flexibly
- offering choices and options
- finding space for L1
- valuing uncertainty

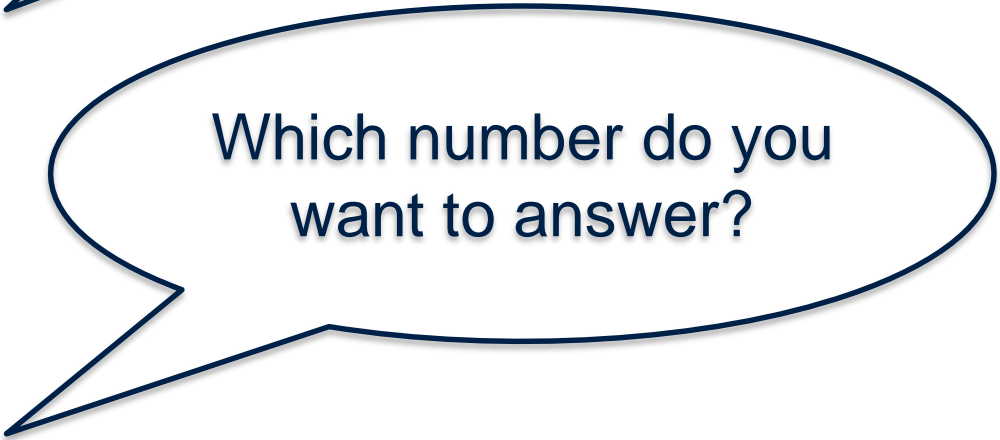

Compromise

A willingness to negotiate

- Agree on dates and schedules
- Provide options when checking work

Let's decide which day to have the test...

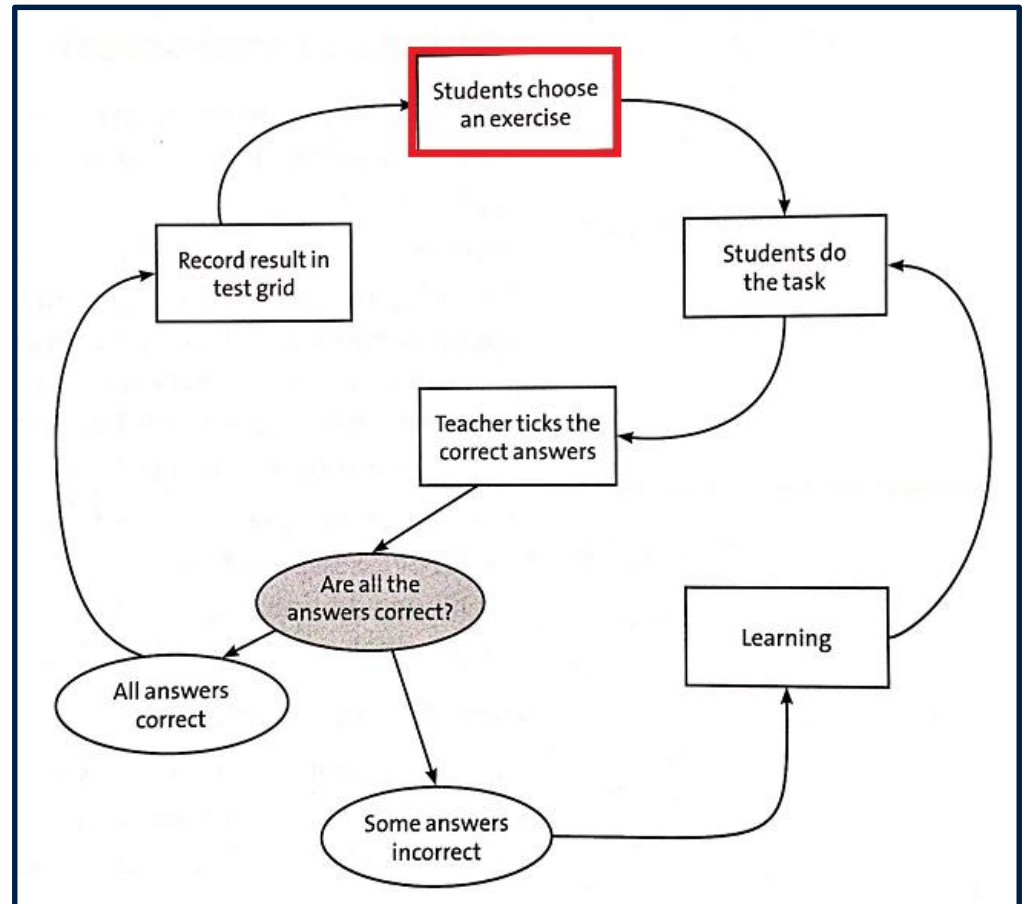

Which number do you want to answer?

Compromise

Handling tests flexibly

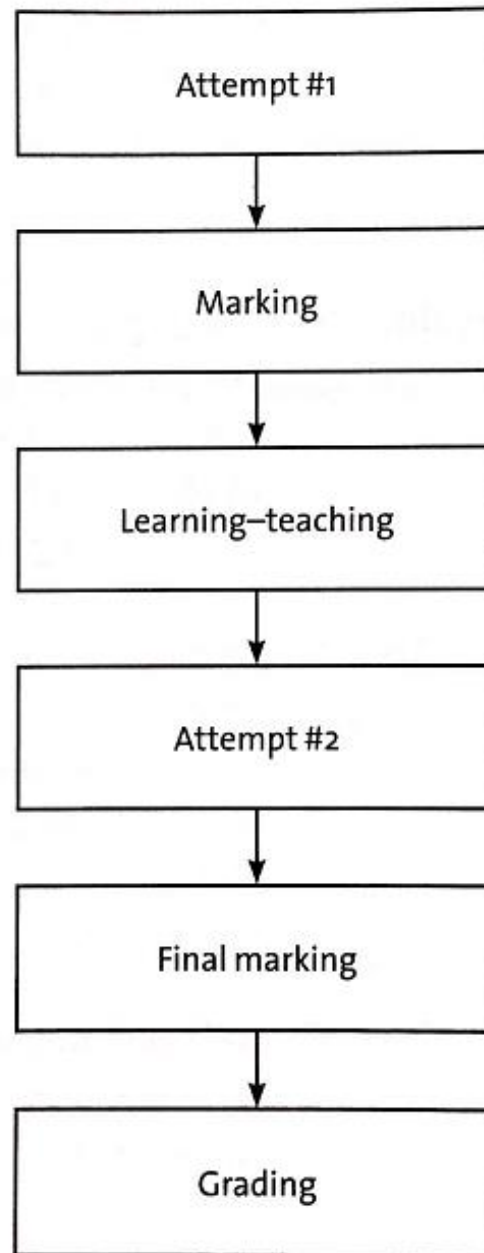

Test box

Compromise

Handling tests flexibly

2-step testing

Compromise

Offering choices and options

- Try alternatives to word limits for writing tasks
- Debate which vocabulary item is the hardest to learn – and then remove it from the list

I'd like you to write as much as you can in seven minutes...

Which vocabulary item would you like to "kill"?

Compromise

Finding space for L1

Compromise

Use a scale of 1-5

Can you identify the famous person?

- 1: We have no idea. Let's say...
- 2: Our guess is that it's...
- 3: It looks a bit like...
- 4: We're pretty sure it's...
- 5: That's definitely...

My Four C's

1. Curiosity
2. Challenge
3. Compromise
- 4. Compassion**

Compassion

- recognising effort
- promoting a growth mindset
- positive communication
- providing time
- *signals from the future*

Compassion

Recognising effort

- pay attention
- notice when students are trying
- praise effort
- reward attitudes

Compassion

Promoting a growth mindset

OXFORD
UNIVERSITY PRESS

“Test scores ...tell you where a student is, but they don’t tell you where a student could end up.”

Carol Dweck *Mindset*

Compassion

Promoting a growth mindset

Fixed mindset

- Success is a result of talent
- Success and failure are *identities*
- “You either have it or you don’t”
- Tendency to avoid challenges

Growth mindset

- Success is a result of hard work
- Success and failure are *provisional outcomes*
- “Everyone can improve over time”
- See challenges as learning opportunities

Compassion

Being supportive *and* demanding

OXFORD
UNIVERSITY PRESS

Two components:

passion (staying focused)

perseverance (bouncing back from setbacks)

talent x **effort** = skill

skill x **effort** = achievement

Angela Duckworth *Grit*

Compassion

Positive communication

OXFORD
UNIVERSITY PRESS

The problem with motivational team talks...

Compassion

Positive communication

Instead of telling students what they mustn't do...

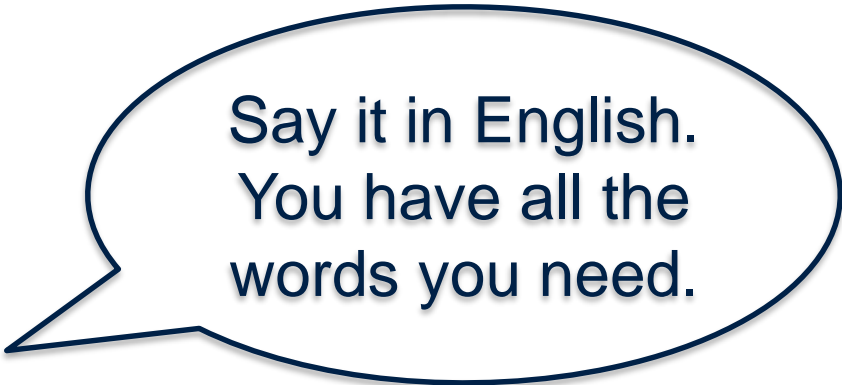

No speaking
Romanian!

No stupid
mistakes on
the test!

...tell them what you would like them to do, and why/how they can accomplish it

Say it in English.
You have all the
words you need.

Take your time.
Check your work
carefully when
you're done.

Compassion

Providing time

Within the lesson:

→ give students time to settle

Over the course of the year

→ give students time to develop

→ engage “the power of **yet**” (Dweck)

Compassion

Signals from the future

Everything turned out OK

David still remembers acutely what it was like to be his nine-year-old self. “I feel like I’m in touch with that person today,” he says. “Whenever I’m doing something that I think is cool, like if I’m in New York City in a room full of people, interviewing Alicia Keys or something, I send a message back to that person and let him know that everything turned out OK. I feel like when I was nine, I was receiving that signal from the future, which is one of the things that gave me the strength to hang in there. I was able to create this loop between who I am now and who I was then.”
